RC 88

Against molds and algae

High concentration

Code	0821
Description	Antibacterial, antifungal, anti - mold additive for water - based paints, formulated in a very concentrated form for an effective addition to the water - based paints, transforming them into real anti - mold paints.
Use	« RC “88” » must be added to the water - based paints at the time of application, (it is in this way that it exercises the maximum of its anti - mold power), making them suitable for varnishing rooms which, due to the presence of high humidity, are subject to the formation of mold. Its efficacy gives the system protection against fungal infestation.
Specific weight	1 gr/ml
VOC	0 gr/ liter
Dose	200 ml. for 14 litres of paints
Note	Mix well the product before the use and, once mixed to the water - based paint, mix until completely dispersed.
