

ALLUMINIA

Interior decoration

Good washability

Description

Alluminia is a decorative finish for interiors, super washable with a "starry effect". It is composed of water-based acrylic resins and special aluminum bases. It is easily applicable, even by those who do not have much experience in painting.

Use

It is used for the decoration of both domestic environments and shops, bars, hotels, pubs, discos, as the final appearance that the walls acquire goes perfectly with both modern and contemporary furnishings and classic furnishings. Its use makes environments lively and playful. Pleasant to the touch. It can be applied on any type of support, obviously pre-treated.

Appearance of the film

White color and folder tints

Hardening

Physical by water evaporation and polymer coalescence.

Specific weight

1330 gr/l

VOC

12gr/l

Estimated yield

6 mq / liter
